Work experience

IT employee 1st line user support

Sep 2021 - Present

[AZ- Turnhout, Turnhout](#)

I am currently employed as a 1st line employee in the AZ- Turnhout. I provide support for all employees within the hospital. When these employees have software or hardware issues, I'm the first in line to support them. I document these problems so that they can be proactively avoided in the future. This happens both independently and in a team.

Project manager

Mar 2019 - Sep 2021

[Private limited liability company, Yannick Van Duppen BV, Turnhout](#)

I was responsible for the development of complete interior projects for Dovy Kitchens and Philip Helsen. Based on the customer's needs, I designed their dream interior. Afterwards, I was responsible for managing the project. I took my measurements myself, attended site meetings, and worked out full technical plans for all the parties involved. All communication and administration were also part of my duties. It was my job to keep the various parties informed of everything that had been discussed. This continued until the project was completed in a correct manner.

Workman

Oct 2016 - Mar 2019

[Mens NV, Herentals](#)

Education and Qualifications

Computer programming

Sep 2022 - Present

[Thomas More highschool, Geel](#)

During my first year of system and network management, I learned that programming is what I love most.

System and network management

Sep 2021 - 2022

[Thomas More highschool, Geel](#)

As soon as I started working at Turnhout hospital, I also started my first year at Thomas More high school.

Finance and Insurance

2011 - 2016

[Thomas More highschool, Geel](#)

Completed the full bachelor's degree except for the claims settlement course and final internship.
